6+ Live Apps (App Store & Play Store) | 8+ Enterprise Projects | Real-Time Systems | CI/CD Automation

SUMMARY

Results-driven Flutter Engineer with ~3 years of experience architecting, building, and scaling production-grade mobile applications used in industrial and enterprise environments. Proven track record of owning end-to-end mobile systems, from architecture design and state management strategy to CI/CD automation and App Store & Play Store releases.

CORE IMPACT & HIGHLIGHTS

- Architected and shipped 6+ production mobile applications with full ownership of development, architecture, and deployment
- Designed scalable Clean Architecture with modular feature-based structure for enterprise Flutter apps
- Engineered real-time WebSocket systems supporting 1000+ concurrent machine data streams
- Automated CI/CD pipelines using Fastlane & GitHub Actions, reducing manual release effort by ~70%
- Improved application performance by ~40% through refactoring and rebuild optimization
- Delivered 8+ end-to-end enterprise projects across IoT and warehouse domains
- Strong expertise in Bloc, Riverpod, API abstraction, and production debugging
- Built high-quality Flutter UI screens with pixel-accurate design implementation, responsive layouts, and smooth animated interactions.

TECHNICAL SKILLS

Mobile: Flutter, Dart

Architecture: Clean Architecture, Modular Architecture, Dependency Injection, Scalable Feature Modules

State Management: Bloc, Riverpod, Provider, GetX

Design & Prototyping: Figma (UI/UX design, prototyping, design-to-code handoff)

Backend & Integrations: REST APIs, WebSockets, Firebase (Auth, FCM), JSON Serialization

Databases & Storage: SQLite, Secure Storage, MSSQL

CI/CD & DevOps: Fastlane, GitHub Actions, Git, Play Console, App Store Connect

Performance & Testing: Unit Testing, Widget Testing, Flutter DevTools, Profiling & Optimization

AI- Development Tools: Claude Code, GitHub Copilot, Anti-gravity, Kiro, Stitch

PROFESSIONAL EXPERIENCE

ACEMICROMATIC MANUFACTURING INTELLIGENCE TECHNOLOGIES PVT. LTD

Bengaluru, Karnataka

Software Engineer

AUG 2023 - Present

Architecture & Technical Ownership

- Architected scalable Flutter applications using Clean Architecture and modular feature-based design
- Defined project structure, dependency injection patterns, and reusable core modules for maintainability
- Introduced structured state management (Bloc/Riverpod) to replace tightly coupled legacy implementations
- Contributed to architectural decisions for new features, performance improvements, and scalability planning

Real-Time Industrial IoT Platform (AMG-mIoT / mIoT-CNC)

- Engineered WebSocket-based real-time data streaming system handling 1000+ concurrent machine connections
- Built high-performance KPI dashboards with optimized state updates and minimal widget rebuilds
- Developed alerting, analytics, and reporting modules used by 2K+ active industrial users
- Optimized rendering and memory usage for continuous real-time data visualization

End-to-End Product Development & Leadership

- Led end-to-end feature delivery from requirement analysis to production release across 8+ enterprise apps
- Owned complete release lifecycle including build automation, signing, provisioning, store compliance, and rollout

Performance, Scalability & Reliability

- Refactored legacy codebase improving app responsiveness and performance by ~40%
- Implemented offline-first architecture using SQLite for industrial use cases
- Added unit and widget tests for critical business workflows to improve application stability
- Used Flutter DevTools for profiling, memory optimization, and performance tuning
- Improved error handling and state resilience in real-time streaming scenarios

Platform & Native Integrations

- Integrated platform-specific features using Swift (iOS) and Kotlin (Android)
- Implemented deep linking, Widgets, background services, and advanced permission handling
- Integrated Zebra Scanner SDK for enterprise warehouse and industrial workflows

LIVE PRODUCTION APPLICATIONS

mIoT-CNC – Industrial IoT Monitoring App (iOS & Android)

- Real-time machine monitoring platform used in live industrial environments
- Built scalable real-time architecture using Flutter, WebSockets, and REST APIs
- CI/CD-enabled automated deployment pipeline

Gunaastra – Enterprise Operations Mobile Application

- Multi-module enterprise app with role-based workflows and API-driven architecture
- Designed scalable modules and reusable business logic layers

Developer Accounts:

App Store: <https://apps.apple.com/in/developer/aravinda-hv/id1319196432>

EDUCATION

JYOTHY INSTITUTE OF TECHNOLOGY

Bachelor of Engineering in Information Science

CGPA: 9.27

Bengaluru, Karnataka

2019 - 2023

ADDITIONAL HIGHLIGHTS

- **Mentorship:** Actively mentored fresher engineers in Flutter fundamentals, Clean Architecture, and professional coding standards.
- **UI/UX:** Designed and iterated on mobile UI screens in Figma; experienced in component libraries, responsive layouts, and design handoff workflows.
- **XR & Emerging Tech:** Completed POCs with Unity, React Three Fiber, and Meta Quest / OpenXR — bringing cross-disciplinary perspective to mobile product roadmaps.
- **Co-curricular Activities and Awards:**
 - Best Outgoing Student
 - Served as Core Member of the Student Coding Club of JIT.
 - CSI Student Chapter Hackathon Winner
 - Most Innovative Game Winner in a 72-hr Gameathon
